REFINERY

- Website: refinerycms.com
- Rails 3
- Aktuelle Version: 1.0.3
- Erste Version: Mai 2009
- komplett ins Deutsche übersetzt
- Github: 1,571 Watcher, 439 Forks

ENGINES

- Wenige Erweiterungen verfügbar
- Blog, Kalender, Anfragen...
- als Gem einzubinden

FRONTEND

BACKEND

The screenshot displays the Refinery CMS backend interface. At the top, a blue header bar contains a button 'Zu Ihrer Webseite wechseln', the 'refinery' logo, and the user 'Blacksurprise' with an 'Abmelden' link. Below the header is a dark navigation bar with tabs: 'Bilder', 'Dateien', 'Events', 'Kontaktanfragen', 'Seiten' (active), and 'Übersicht'. The main content area shows a tree view of the website's page structure. The 'Seiten' tab is selected, showing a list of pages with their status and draft indicators. To the right of the page list are two buttons: 'Neue Seite anlegen' and 'Seiten umsortieren'. A search bar with a 'Suchen' button is also present.

Page Name	Status	Draft	Actions
